

FIRE SAFETY AND EXIT PLAN

Bengaluru Office

Date: 08 September 2026

1. PURPOSE

This document outlines fire safety procedures and exit routes for the office in Bengaluru. It is intended to help all occupants respond quickly and safely in the event of a fire or other emergency requiring evacuation.

2. GENERAL FIRE SAFETY PRINCIPLES

- Prevent: Keep exits clear, do not block fire doors, and avoid overloading electrical sockets.
- Detect: Know the location of smoke detectors, manual call points, and fire alarms.
- Contain: Close doors behind you when evacuating to slow the spread of smoke and fire.
- Evacuate: Leave the building immediately when the alarm sounds; do not wait to collect personal items.
- Assemble: Go directly to the designated assembly point and wait for further instructions.

3. FIRE SAFETY EQUIPMENT (TYPICAL)

Locations may vary by floor; confirm with facilities management.

- Fire extinguishers: Usually located near exits, stairwells, and kitchen/pantry

areas.

- * Water (Class A): For paper, wood, textiles.

- * Foam: For flammable liquids and solids.

- * CO2: For electrical equipment.

- * Dry powder: Multi-purpose; use with caution indoors.

- Fire hose reels: Typically in corridors near staircases.

- Manual call points (break-glass): Near exit doors and stairwell entrances.

- Smoke detectors and heat detectors: On ceilings in corridors and rooms.

- Emergency lighting: Along escape routes and above exit doors.

- First-aid kits: Near reception/pantry or as indicated by facilities.

4. IN CASE OF FIRE – IMMEDIATE ACTIONS

If you discover a fire:

1) Raise the alarm:

- Activate the nearest manual call point (break-glass).

- Shout "Fire!" to alert nearby occupants.

2) Call emergency services (if safe to do so):

- Dial 101 (Fire) or 112 (All emergencies) in India.

- Provide: building name, floor, exact location, nature of fire, any trapped persons.

3) Evacuate immediately:

- Use the nearest safe exit; do not use lifts/elevators.

- Close doors behind you (do not lock).

- Assist visitors and anyone who may need help.

4) If you hear the fire alarm:

- Stop work immediately.
- Leave via the nearest marked exit.
- Proceed to the assembly point.

5) Do NOT:

- Use lifts/elevators.
- Go back inside for personal items.
- Re-enter the building until authorized by fire services or building management.

5. EVACUATION ROUTES AND EXITS (TEMPLATE)

Adapt the following to your actual floor plan.

Ground Floor / Main Office Area:

- Primary exit: Main entrance lobby -> outside to street.
- Secondary exit: Rear emergency door -> side lane.
- Route: From workstations, follow green "EXIT" signs to the nearest stairwell or door.
- Assembly point: Open area outside the building, at least 15–20 meters from the structure (e.g., parking lot or designated courtyard).

Upper Floors (if applicable):

- Primary exit: Stairwell A -> ground floor -> main entrance -> assembly point.
- Secondary exit: Stairwell B -> ground floor -> rear exit -> assembly point.
- Route: Move calmly to the nearest stairwell; keep to the right; allow emergency personnel to use the left side if needed.

Notes:

- All exit doors must remain unlocked during working hours.

- Corridors and stairwells must be kept clear of boxes, chairs, and equipment.
- Familiarize yourself with at least two escape routes from your usual workstation.

6. ASSEMBLY POINT AND HEADCOUNT

- Designated assembly point: [Insert specific location, e.g., "Front parking area, near security booth"].
- Department heads / team leads:
 - * Take a headcount of their team.
 - * Report missing persons to the fire warden / building security.
- Do not leave the assembly point until instructed by fire services or management.

7. FIRE WARDENS / RESPONSIBILITIES

(To be filled by your facilities / HR team)

- Chief Fire Warden: [Name, contact]
- Deputy Fire Warden(s): [Name(s), contact(s)]
- Floor Wardens: [Name(s) per floor]

Responsibilities:

- Ensure all occupants are aware of evacuation routes.
 - Check restrooms, meeting rooms, and common areas during evacuation (if safe).
 - Coordinate with emergency services on arrival.
 - Maintain records of drills and incidents.
-

8. FIRE DRILLS AND TRAINING

- Conduct fire drills at least once every 6–12 months.
- Train staff on:
 - * How to raise the alarm.
 - * Location and basic use of fire extinguishers (for designated staff).
 - * Evacuation routes and assembly point.
- Review and update this plan whenever there are changes to:
 - * Office layout, seating, or partitions.
 - * Exit routes or emergency equipment.
 - * Staffing levels or key responsibilities.

9. SPECIAL CONSIDERATIONS

- Persons with disabilities:
 - * Identify those who may need assistance.
 - * Assign buddies to help during evacuation.
 - * Use ramps and designated accessible routes where available.
- Visitors and contractors:
 - * Inform them of exit routes and assembly point upon arrival.
 - * Ensure they follow evacuation instructions during an alarm.
- High-risk areas (server room, pantry, storage):
 - * Keep flammable materials stored properly.
 - * Ensure appropriate extinguishers are nearby.
 - * Avoid storing items in front of electrical panels or extinguishers.

10. EMERGENCY CONTACTS

- Fire: 101

- All emergencies (mobile): 112
- Building security / facilities: [Insert number]
- Office manager / HR contact: [Insert name and number]
- Nearest hospital: [Insert name, address, phone]

11. FLOOR PLAN SKETCH (TO BE ATTACHED SEPARATELY)

Attach a simple floor plan showing:

- Your current location ("You are here").
- Primary and secondary exit routes (arrows).
- Location of fire extinguishers, hose reels, and call points.
- Assembly point outside the building.

This can be drawn based on your actual office layout and appended to this document.
