Blute Technologies Pvt Ltd is a Bengaluru-headquartered IT services and software development company. We deliver custom software, mobile applications, cloud solutions, and staff augmentation services to enterprises across India and internationally.

OUR MISSION

Empowering clients with innovative technology solutions that solve real-world challenges, delivered with excellence, reliability, and measurable results.

● Innovative Tech Solutions

● Solve Real world challenges

● Deliver Excellence

● Measurable Results

"A company built on the belief that technology should simplify, not complicate the path to growth."

OUR VISION

To help enterprises untangle digital complexity, accelerate technology adoption, and orchestrate a future of constant innovation.

What We Build & Deliver

01

Untangle

Digital Strategy & Consulting

Before you build, you must simplify. We help you navigate legacy mess and modernise your foundation.

- **Legacy Modernisation:** Assessing and refactoring outdated systems to fit modern business needs.
- **Digital Transformation Roadmap:** Clear, actionable strategy to transition from current state to digital leader.
- **Complex Problem Solving:** Identifying bottlenecks in your tech stack that hinder growth.

02

Accelerate

Product Engineering & Delivery

From the first spark of an idea to a high-performance launch. We build fast, without breaking things.

- **Ideation & Conceptualisation:** Collaborative workshops to turn "what if" into a validated product blueprint.
- **Consumer-Oriented Apps:** Designing and developing intuitive mobile and web experiences that users love.
- **Enterprise-Class Solutions:** Robust, scalable software built to handle the rigorous demands of global business.

03

Orchestrate

Managed Services & Growth

Innovation isn't a one-time event; it's an ongoing process. We stay by your side to keep you ahead.

- **Long-Term Maintenance:** Proactive support and performance tuning to ensure 24/7 reliability.
- **Continuous Innovation Support:** Iterative updates and new feature integration to maintain your "edge."
- **Global Scalability:** Orchestrating your digital solutions to perform seamlessly across different markets.

BACKEND

Java Spring Boot · Spring MVC · Spring Cloud · .NET Core · Python · Node.js · REST API · Microservices

FRONTEND

Angular · React · TypeScript · HTML5 / CSS3 · Bootstrap · jQuery

MOBILE

Flutter · Ionic · React Native · Android (Java)

DATABASE

MySQL · PostgreSQL · MongoDB · Oracle · Microsoft SQL

CLOUD & DEVOPS

AWS (EC2, S3, RDS) · Microsoft Azure · Docker · CI/CD Pipelines · Git / GitHub

INTEGRATIONS

Keycloak / OAuth2 · Stripe / Razorpay · SAP · REST / SOAP · Kafka / RabbitMQ

Engagement Models

01

Fixed Price

Project-based delivery

- Defined scope & deliverables
- Fixed timeline and cost
- Milestone-based payments
- Ideal: well-scoped projects

02

Time & Material

Flexible delivery

- Evolving requirements welcome
- Sprint-based with fortnightly demos
- Pay as you go model
- Ideal: complex / exploratory builds

03

Staff Augmentation

Team extension

- Dedicated resource(s) on your team
- Long or short-term contracts
- Direct team integration
- Ideal: skill gaps, scaling teams

04

Managed Services

Ongoing operations

- Post go-live support & monitoring
- SLA-backed response times
- 30-day hypercare included
- Ideal: production systems support

• Fortnightly Demos

• Agile Sprints

• One Point of Accountability

• 30-Day Hypercare

• Bengaluru-Based Team

Six Reasons Clients Choose Us — and Stay

01

Proven in Production

Every solution we reference is a live, production-grade system — not a demo. Real clients, real deployments, real outcomes.

02

End-to-End Accountability

One team scopes, designs, builds, tests, deploys and supports. No vendor handoffs, no integration risk, no blame gaps.

03

Bengaluru-Based Delivery

Our core team is headquartered in Bengaluru. On-site visits, training and support are real — not just a support portal.

04

Domain-Deep Expertise

We understand BFSI compliance, manufacturing safety, healthcare workflows — not just code. We solve business problems.

05

Fully Configurable

Our platforms adapt to your operations — roles, workflows, alerts, integrations. We don't force you into a rigid product.

06

30-Day Hypercare

After go-live we actively monitor, fix and iterate for 30 days. Your ops team is never left alone with a new system.

08

CASE STUDIES

Proven Deployments. Real Business Impact.

Every case study on the following slides represents a live, production system — real clients, real complexity, measurable outcomes.

E-Contractor Management System

100%

Paper Eliminated

0

Uncertified On-Site

<4 hrs

Access Approval

8 Wks

Full Go-Live

THE CHALLENGE

Manual paper onboarding — no traceability

Uncertified contractors entering restricted zones

No zone-based access enforcement

Risk Work Plans managed via email chains

No contractor or tool movement tracking

THE SOLUTION

1 Digital Registration & Onboarding**2** Training & Certification Engine**3** Zone Access Control & Grant Access**4** Risk Work Plan (RWP) Management**5** Movement Tracking (Contractor & Tools)**6** Incident Reporting & Escalation

OUTCOMES

100% paperless — all workflows digitised

Zero uncertified contractors — system enforced

Access approval: 3 days → under 4 hours

HOD-approved RWP extensions — fully digital

Tamper-proof audit trail for every entry

“The system removed the human dependency from safety compliance — it is now structurally enforced.”

Technology: Java Spring Boot · Angular · MySQL · REST API · RBAC

Manufacturing / Industrial · Large Industrial Facility

Fixed Price · 8-Week Deployment

OT Planner: Workforce Management System

AI Powered

Auto Population

8 Rules

Smart Filter Logic

ZERO

Manual Planning

Real Time

Merit Tracking

THE CHALLENGE

separate Excel files used offline for OT management

Manual tracking of OT by zone, skills, and shift

No real-time visibility of overtime allocation

Inefficient process to identify eligible operators

No merit/demerit tracking for fair distribution

THE SOLUTION

1 Integrated OT Request & Support Table

2 Attendance Excel Integration (Monthly View)

3 Eligibility Calculator for Last-Minute OT

4 System-Populated Operator Lists

5 Data Center Filter Logic (8 Rules)

6 Merit/Demerit Tracking System

OUTCOMES

Automated OT planning with AI-powered allocation

Color-coded real-time visibility of all overtime

Fair distribution via merit-based assignment

Auto-match operators by module/zone/skills

Eliminated manual Excel file management

"Smart filtering using absenteeism, skills, rest days, and merit points — optimized operator allocation with complete fairness."

Technology: Java Spring Boot · Angular · SQL Server · Smart Algorithms

Manufacturing / Semiconductor · Large Industrial Facility

Phased Build: Fixed price

Delivery Management System

Real-time

Route Optimisation

3 Apps

Manager, Delivery person, Customer

100%

Digital Proof of Delivery

Auto

Dispatch & Alerts

THE CHALLENGE

Manual dispatch — no routing intelligence

No real-time driver tracking or visibility

Paper-based proof of delivery

Customer complaints on delivery ETAs

No live management dashboard

THE SOLUTION

1 Automated Dispatch & Smart Routing

2 Driver Mobile App (iOS & Android)

3 Live Manager Dashboard

4 Customer Real-Time Tracking Portal

5 Automated SMS/Email Alerts

6 Proof of Delivery (Digital Signature)

OUTCOMES

Dispatch fully automated — zero manual calls

Real-time GPS tracking across all deliveries

Customer satisfaction improved via live ETAs

Digital POD eliminates disputes and errors

Manager dashboard: full visibility on delivery

“End-to-end visibility of every delivery — from booking to proof of delivery — on one screen.”

Technology: Java Spring Boot · Angular · Ionic · MySQL · Google Maps API

Logistics / Last-Mile Delivery · Distribution & Logistics Operator

Fixed Price · End-to-End Build

Integrated CRM & Field Service Platform

360°

Business Visibility

Zero

GST Discrepancy

4 Modules

Unified Platform

Mobile

Field Technicians

THE CHALLENGE

Manual sales tracking from leads to payment

No real-time inventory or serial number control

Disconnected field service & installation workflows

Purchase orders managed in spreadsheets

No automated warranty tracking or alerts

THE SOLUTION

1 Sales CRM — Lead to Invoice

2 Inventory Management with Serial Numbers

3 Purchase & Procurement Module

4 Field Service Management (Installation)

5 Warranty Tracking & Service Alerts

6 Technician Mobile App (React Native)

OUTCOMES

Automated GST & E-Invoice generation

Serial number batch control — zero discrepancy

Transparent vendor comparison & pricing

Mobile technicians with real-time job updates

Complete 360° business visibility — one platform

“Four business functions — sales, inventory, procurement, field service — unified in one platform with complete audit trails.”

Technology: Java Spring Boot · Angular · React Native · MySQL

Industrial / Manufacturing · Indian Industry Equipment Manufacturer

Phased Build · Fixed Price

HeyLearnO — EdTech SaaS Platform

5000+

Students Supported

99.9%

System Uptime

26%

Cost Saved

Multi

Question Types

THE CHALLENGE

No structured digital platform for selective school prep

Fragmented tools with no progress tracking

No automated assessment or scoring engine

Missing leaderboards and analytics for students

No admin panel for scalable content management

THE SOLUTION

1 Bundle-Based Learning Packages

2 MCQ, Gap Fill, Essay, Comprehension Engine

3 Automated Scoring & Grading

4 Student Progress Analytics Dashboard

5 Leaderboards & Gamification

6 Admin Panel — Content Management

OUTCOMES

5,000+ students onboarded on SaaS platform

99.9% uptime maintained on AWS infrastructure

26% reduction in AWS operational costs

Automated scoring — zero manual grading

Stripe (AUD) payments fully integrated

“A complete learning ecosystem — bundles, assessments, analytics, and leaderboards — built for scale on AWS.”

Technology: Angular 16 · Spring Boot 3 · Java 17 · MySQL 8 · Keycloak · AWS · Stripe

Education Technology · Australian Selective School Exam Prep

Order Management Mobile App

Play Store

Published & Live

On-Spot

Order Placement

Real-time

Order Status

Zero

Back-Office Trips

THE CHALLENGE

Sales reps had to return to office to place orders

No mobile solution for field order entry

Complex lens data entry with no validation

No real-time order status visibility for reps

Time lost searching historical orders

THE SOLUTION

1 Mobile Order Placement (On-Spot)

2 Lens Data Entry with Advanced Options

3 Real-Time Order Status View

4 Order Search & Filter by Product

5 Order Review Screen Before Submission

6 Sent Orders History

OUTCOMES

Orders placed on-site in front of buyer

App published on Google Play Store

Productivity improved — zero travel back to office

Order review screen reduces entry errors

Time management significantly improved

“Sales reps can now take orders on the spot, check status in real time — no more back-and-forth to the office.”

Technology: Java Spring Boot · Angular · Ionic · MySQL

Optical / Healthcare Retail · Optical Equipment Distributor

Mobile-First Build

Vendor Portal & Supply Chain Integration

5→3 hrs

Daily Ops Time Saved

Zero

Manual Interference

Auto

Email Notifications

Role-Based

Data Access Control

THE CHALLENGE

Vendors had no visibility into PO status

Dispatch & delivery communicated via email/phone

5 hours per day spent on manual coordination

No consolidated reporting or audit trail

Sensitive vendor data not segmented by role

THE SOLUTION

1 Vendor PO Tracking & Status Dashboard**2** Dispatch & Delivery Communication Portal**3** Consolidated Excel Report Generation**4** SAP Integration Layer**5** GPS & Visualisation Module**6** Role-Based & Vendor-Specific Data Access

OUTCOMES

Daily ops time reduced from 5 hrs to 3 hrs

Automated email notifications — zero manual calls

Vendors self-serve PO tracking — no phone queries

Downloadable reports with full data history

Vendor data confidentiality structurally enforced

“Vendors now track their own POs, communicate dispatch details digitally, and receive automated notifications — no manual intervention.”

Technology: .NET · Angular · MySQL · SAP Integration · GPS API

Enterprise Integration · Fixed Price

Time Tracking & Job Management System

Defined

Process Workflows

Daily

Productivity Timeline

3rd Party

App Integrations

Auto

Invoicing

THE CHALLENGE

No visibility into team time allocation per job

Manual tracking of assigned, pending, completed tasks

Compliance reporting done manually

No integrated invoicing from time logs

No dashboard for HOD and project heads

THE SOLUTION

1 Defined Process Flow Engine

2 Job Assignment & Status Tracking

3 Daily Productivity Timeline View

4 HOD / Project Head Dashboard

5 3rd Party Integration Support

6 Automated Invoicing from Time Logs

OUTCOMES

Detailed view of all assigned, completed, pending jobs

Compliance followed as per organisational norms

Visual and downloadable reports for management

HOD dashboard with full team productivity view

Invoicing automated from approved time entries

“Time tracking, job management and invoicing — all in one system that enforces process compliance automatically.”
